

Respected sir/madam,

I am writing this mail regarding visa capping bill which is going to affect hairdressing and cookery students who already applied permanent residency. I am also one of them waiting my result since 2 years. I spent lot of money to get that but now its dark everywhere. I havent sleep properly from 4 yrs doing too much stuggle everyday. We did trust australain govt. and had dream that one we will success. where is our fault if howard govt. approved that many visa for cooker and hairdesser. why we are suffering this, what ever the requirements were we done that. I was newly married and young when i came to left my old parents who does pray everyday for my future. They are also upset and crying there when they knew. I got mentally dipression everyday changing rules for students, i thought when I applied my PR then I would b safe, I was counting days when i will finish my study nd lodge the application because we have always fear dont know when govt. will change the policy. But this fear proved reality today. I am 32 yrs married. I wanted to pragnent since four years but couldnt try thought after PR. I dream every day about my baby but it s too much struggle here. I lost my time and golden days. But i had hope that once i ll get PR everthing will be fine. I never thought that Govt can cease those applicants files who already applied. Pls dont break our trust. We do have too many expectation from australain govt. We chose this country to have bundle of qualities.

I do requset Pls dont make that rule which will spoil our future. Even I already applied state sponsorship as well. Many applicants who applied they ready to move there. Please find some solution in our favour.

Thanks & regards
Navpreet kaur
