

To: Committee, EC (SEN)
Inquiry into the EPBC Amendment Bill 2013 [Provisions]

I surely don't need to "submit" anything other than to point out the obvious: that the potential impact of CSG on our aquifers and water tables could be devastating. Government must be able to - rather, be required to - ensure that CSG exploration and exploitation are safe, and the decision must be based on thorough, credible, and independent research.

Kind regards
Name: Peter Wesley-Smith
