

My name is Alex and I was conceived through donor conception. I am 13 years of age and would like to contribute my thoughts on the discussion you will be having about donor conception.

I would like to be able to find out about the health and family history of my donor. I don't actually want to meet him but I would like to know more about him. I would like to be able to ask him questions about inherited diseases in his family. It would be good if I could find out whether or not some of my traits are inherited from him.

The clinic my parents went to have tried to find out some of this information for me but unfortunately we have to wait for him to contact the clinic. It would help if we could get a message to him through the internet or on the TV because he might not even know that I am interested.

I would like you to do everything you can to help me get this information.

Thank you
