

UNMARKED BABIES & CHILDREN'S GRAVES

In the history of babies and children been removed from their birth families and placed in Institutions last century throughout Australian thousands had died while in government and church run institutions they have been buried without dignity No Names, Dates or their ages in massive UNMARKED grave sites this is another terrible reflection on the way babies and children were treated in this country, it's if they never existed. Many of the babies and children are Forgotten Australians relatives, I feel that it's the Commonwealth Government responsibility to make sure that all states and territories acknowledge and place Plaques to all grave sites throughout this country. My brother died while I was in care and was denied to say good bye along with my other siblings.
