

22nd April, 2013.

To : The Members of the Senate and Finance Administration Committee,
Parliament House,
Canberra.

I am writing to support the introduction into Federal Parliament, by Senator John Madigan, of a Bill that would remove Medicare funding from the abhorrent practice of abortion for sex selection.

I find it obscene and offensive to suggest that the gender of a child can be its death sentence. It is also obscene that public money should be available to fund such abortions.

Each child is a unique GIFT, and should not be expected to conform to "designer standards". **The unborn have a right to life.** This Bill is really fighting for the protection of these unborn.

I support it wholeheartedly, and urge the Members to consider, seriously, doing the same.

Yours sincerely,
