

Hi

Me Muhammad Rashid is been living in Australia nearly 5 years. I came here to study and live here . After studying here sometime, i found Australia as a very good and safe place to live. I studied and worked in my profession.I struggled to qualify for residency. Then i applied for my permanent residency 2008. I have been waiting desperately to stay in Australia and want to be an Australian but immigration policies remained changing.Now Government wants to cancel these applications which is very hurting news.I wasted 5 years of my live, energy and also changed my life style to stay in Australia.Thousands of lives are gonna affect with this action.Alots of people will loose the aims of their lives.I can only request to u to stop this action. If Government do not need more immigrants pl z stop taking more applications but finalize the previous applications.
