

1. Page 7 – *pers comm.* about decimation of koala numbers was relayed via a mine worker, not a driver
2. Page 33 Our suggestions for Acland

Omitted- Outright refusal of Stage 3 expansion due to many adverse environmental and social impacts including the impact on koalas

If Stage 3 is approved then protect the town site including the Heritage listed Colliery (and its surrounding poplar box woodland), the Tom Doherty Park, the Acland War Memorial and wildlife corridors.

3. Page 35 Our suggestions (cont) to minimise the impact of Queensland's koalas
No Mining should be allowed on koala habitat or linking movement corridors (instead of refusal of mining approval if populations deemed at risk)
4. Further suggestions (additional to other suggestions)
Research is needed into the impact of nearby coal mining on the health and nutrition of koalas
Eg stress from blasting, inhalation effects of chemicals in coal dust, blasting residues and diesel fumes, ingestion effects of coal dust accumulation on food source (eucalypt leaves).
