

To Whom It May Concern

We cannot understand a Government that allows supermarkets to set the price of fresh produce at below the cost of production.

Its all about market control & forcing farmers to subsidise the supermarkets already inflated prices on other products.

If Governments dont support their farmers & allow the supermarkets to continue in their fight for market control, there will be no farmers left in this country.

America & England protect their farmers, why dont we??

We cant compete with subsidised countries & now we are fighting our own country for a fair go!

When is Government going to wake up & do the right thing?

PM Jillard was saying in relation to carbon credits "Its the right thing to do!"

Dont you think that protecting farmers & the Australians right to fresh safe food is "the right thing to do?"

Supermarkets care about one thing only....the bottom line. THEIR BOTTOM LINE.

Look what happened in China so recently with the baby formula that killed the very babies it was supposed to nurture!

Do we want food coming from countries that have no quality control?

Thats exactly what will happen if farmers are forced out of the industry!

Wake up Politicians! Would you like to work for nothing?

How would it be if you were told you had to work 7 days a week & earn the same pay as if you worked 2 days?

I'd also like to know why the cut off date for submissions was so tight. Was it because Government was hoping that no-one would have time to submit?

I used to be a proud Australian. Now I wonder why I even bother!
