
I write in concern of the present day attitudes toward God given life.

It was once said; "How can we have a world with peace when mother's murder there own babies" said by Mother Theresa.

In a society where drug & alcohol abuse, violence, and mental health issues are climbing at an alarming rate. It is time we turned our heads away from our destructive ways and back toward the furthering of the restoration of one man - one woman marriages - for life!

When relationships and the stability of family is valued - then life will be honoured as precious, an only then will our nation will be restored.

The Word of God says when we turn from our wicked ways, humble ourselves and pray then God will heal our land.

Australia is a nation established on Christ centered principles.
Placing our guidelines for living on the Word of God and knowing Jesus - really is the only answer.

Regards
Heather Cambridge.
