

I have been defending Doubtful Creek in the Northern Rivers of NSW from the CSG company, Metgasco. Air, soil and water should be public property and NOT negotiable to corporations.

Healthy soil and clean air and water are our greatest natural resources and they belong to future generations, not to the short term needs of greedy corporations. They belong to ME as well as everyone else, and you DO NOT have my permission to contaminate any of them with chemicals of any kind.

STOP the degradation of our planet immediately by saying NO to the CSG industry.

Regards

Melanie
