Subject: Re Facial recognition

To whom it may concern

This is but a brief and succinct email to reject all of the facial recognition legislation poised to covertly monitor and collect information on Australian citizens going about their daily lives. The subversive authoritarian monitoring of a general population WITHOUT consent is the very definition of a surveillance state and roundly rejected by many including myself and my family. To proceed is unconstitutional and would undermine the very fabric of a free, fair and open Australian society. I do not in any way condone now or in the future this behavior by government.

Paul Sharp
Paramedic and concerned citizen.
