On 1 July 2019, the Commonwealth (C'wlth) commenced nationwide reporting of cyber crimes on the cyber.gov.au website. A snapshot of the data provided by the C'wlth since inception is attached.

Data is from victims who are individuals. Data does not include businesses as a victim and does not include anonymous reports.

These statistics rely on victims reporting via the cyber crime portal on the cyber.gov.au Cwlth website. It is a known fact that persons in remote communities can have limited access to reliable internet access.

In relation to the donut graph:

- In summary since 1 July 2019, the total percentage of those persons who identify as Aboriginal and Torres Strait Islander and who have reported as a victim on the website - is 8.89%. The centre ring in the graph represents this entire reporting entire period (2019-2024).

- The graph is presented in percentages, ascending.

- The outer ring represents the individual percentages for each year for the entire period.

In relation to the bar graph:

- This is the same data as provided in the donut graph, however, is presented in year by year format.

- The years 2019 and 2024 are part years only.

- In summary, the number of persons who identify as Aboriginal and Torres Strait Islander and who have reported as a victim on the website is:

    - 2019   6.41%

    - 2020   8.02%

    - 2021   8.82%

    - 2022   8.52%

    - 2023   9.25%

    - 2024   10.8%
