Subject: STOP facial recognition TODAY

Categories: [REDACTED]

To the Committee Secretary,

Re: submission to review, deployment of facial recognition

As an individual who currently lives in the Northern Suburb of Melbourne, it is crucial to consider a pivot.

Camera Surveillance is a safer measure.

Measurements of frequencies from, towers and cells are harmful to All of Us, living organisms, trees, our gum trees and insects.

It KILLS.

These high frequencies are required to roll out facial recognition and drones (flights from the CBD to the airport) and will cause illness (A-Z) due to radiation exposure.

Radiation sickness is the result. Most doctors will then burden the patient with more scans and pills.

WE SUFFER

It also relies on A1 the integrity of a machine. Machines make mistakes. Can we trust IT??? For example, facial features change according to ones health status and mistaken identity possible.

And there is evidence and cause for much concern.

As a community there has been no education nor consultation. This is an attack on humanity. **I am today making the effort to speak up for AUSTRALIA**

It is offensive to the law abiding citizen. Politicians will become slaves or masters to this technology - every one will be tracked. Only G - d needs to know who we are.

It will not curb violence, as damage via frequencies impacts on mental health - and likely instead to cause a spike of violence and mental disorders.

As an EHS individual our life span is significantly reduced. Our days less productive as all energy is spent on mitigating the effects of consistent exposure. I am still alive, because I had the science to back up intuition. I am a very healthy and FIT person.

The Australian way of life and quality of living has diminished.

You may visit my home and check the frequencies, they are harmful. And I have no where to **LIVE**.

Many of my neighbours are sick.

It will make us prisoners within our own homes, as we become unable to travel along our freeways and venture anywhere near Melbourne airport, where the increased levels operate now. Take a drive and test it for yourselves.

Queensland can no longer be a holiday destination - why would i go where nerve damage is guaranteed?

CBD workers will become less competent in doing their work, take more frequent days off work because of a range of symptoms.

Our athletes will suffer directly. We pride ourselves on our sporting achievements. T

The WHO is responsible for the 5 G roll out.

Please investigate fully and put a stop to this madness.

Once informed, realise that this technology kills our ability to breathe and destroys our economy.

We have four years to revive our earth and to reverse the effects of the current frequencies that when measured are Harmful.

STOP facial recognition!! We are not China. You the government are elected, do a pivot NOW !

Please advise of your decision in due course. I would like to remain in my home.

Kind Regards,

Maria Casamento
