

Gary Lang Pensioner

After reading Richard Trudgen's book "Why Warriors lay down and die" I find a further 10 years intervention on these unfortunate people will probably be the end of their ancient culture.

I would recommend all people involved in this proposal read Trudgen's book and view the movie Our Generation.

We, the dominate culture must become more informed about these wonderful people and stop this continual harassment.

Remember, future generations will look at the way that federal and state governments have treated these people right from the very first contact.

Please put yourself in their shoes. How would you like to be pushed and shoved from pillar to post, not knowing when the next piece of disenfranchising legislation will come down on you.

Yours sincerely,

Gary Lang
