

On behalf of NSW Farmers witnesses, please see *response to question on notice re cost per device from Senator Colbeck*.

*We provide the example below from a member:*

- *Replacement of signal repeaters as they will no longer work on the networks once 3G is shutdown.*
- *Member has five repeaters that need to be replaced on the farm– approx. cost of \$1200 per device.*
- *The Cel-fi repeater unit alone costs \$850 to replace. In addition, an aerial for each device is needed, which is around \$250-300 each. If you need the equipment to be installed this is approximately another \$200-300.*
