Dear Ms Harris

**TDA/AEI e2e.net.project.**

I write to you on behalf of TAFE SA in support of the above project submission. TAFE SA is undertaking a series of reforms in response to a Skills Strategy for South Australia's Future that was adopted by the State Government in 2008. A substantial part of this reform is to improve the delivery of services to our clients and our community.

As part of this process, TAFE SA has been in discussion with Graduate Programs Australia (GPA) since November of last year in relation to the potential benefits of e2e. The e2e concept has strong potential in our view to deliver enhanced services in relation to employment to our students. In doing so it offers opportunities to deliver benefits to enterprises and strengthen the links between TAFE SA and Industry.

The initial interest for TAFE SA was sparked by our International activities, such a service would be an attraction and a value add for students. As well it would help to distinguish Australia in competitive International markets.

In short, we have been impressed with the e2e project, it is worthy of serious consideration. We have found GPA to be thoroughly professional in their dealings with us and are pleased to support the TDA/AEI e2e. net.project.

Yours sincerely

**Adrian Marron**  
**EXECUTIVE DIRECTOR**
