

Subject: green loan

Dear David,

Thank you for taking my call today and will tell you my story of this debacle which has me very confused.

I had an energy assessment done in October by Mr Peter Kreig and received the relevant documents including the letter from Mr. Garrett on Monday the 1st March 2010.

As I work fulltime I took this into the Australian credit union on Saturday the 6th March with all the details they needed to approve my loan.

To my amazement I was told that I did not qualify because my mortgage was to high and my income was to low.

Well my mortgage is \$80,000 and I earn \$ 70,000 a year and my wife works part time and looks after our 3 children.

What I want to know is what you have to do to qualify for this loan I feel as though I have been declared bankrupt!!!

If I owned my own home and earned a \$100,000 a year to qualify for this loan I wonder home many Australians are in this position and if they are YOU DON'T NEED THE LOAN !!!.

Basically this is political vote winning stunt that they have tried to trick the Australian people and wasted taxpayers dollars as working class Australians and their families do not qualify.

A fool and his money are soon parted and this current government are proving that they fully qualified professional FOOLS.

Regards,
