

To the Joint Standing Committee on Treaties,

This request is made free and voluntarily, and hereby request that the decision to purchase nuclear submarines and military killing equipment which is all intended for the use of destruction and killing, destroying forever human and animal life as well as unspecified property and ecology now be cancelled and set aside and that Australia is no longer a party to this secret agreement, and any other such agreements or preludes leading to this outcome.

Rather the country & land of Oz should mirror and become the free zone of the South pole, promoting peace and tranquility for the whole of the greater Asian region simulating a Switzerland of the South pole.

The savings would be enormous approaching \$1,000 a household on the cancellation of the \$368B proposed spend.

Citizens, all animal and all plant life would be protected from any potential ill harm inflicted, therefore I see no reason to keep AUKUS going for these secretive kills disguised as invasion protection. Promote peace cancel the deal and share the gains from savings and all can live in a freer safer world. Shut down AUKUS permanently and any other such like set ups.
