

Health Insurance Amendment (Medicare Funding for Certain Types of Abortion) Bill 2013.

Re the above bill I would like to convey my abhorrence of termination of life by abortion procedures and definitely not to compound this crime by incriminating the whole of the Australian people by using Medicare funds.

Medicare funds should only be used for the preservation of human life at any stage of life both in terms of longevity and quality and whatever sex, colour or creed.

I fully support the bill by banning the use of Medicare funds for abortion processes including gender selection.

Regards
