

To whom it may concern

I am writing in support for the wind farms as they have had a huge positive impact in our local rural areas. Not only have they provided sustainable grants for our small local towns but they have provided many jobs in our local area. Furthermore workers are staying in our local towns, which support our local businesses in the area. The local accommodation, hotels, deli's, supermarkets have all seen the benefits from the wind farms

In addition, the wind farms look absolutely beautiful in summer and winter when driving through the country side!

Cheers Tracey
