

TAX = THEFT, all politicians, public servants etc remember this! Each tax increase is stealing money out of the pockets of aussies! People who live off other people's stolen money seem to forget that.

My 82 year old mother's electricity bill has risen from about \$400, 6 years ago to over \$1,000 today! An increase well above inflation, how can this be justified? It's plain criminal THEFT! Any new ETS will just increase the theft. Plus, a Carbon Price will NOT increase green technology, as reported today.

Also, new mining taxes will hit all Aussie shareholders hard, these people are trying to make money the responsible, honest way, why are they being penalised? WHY? To pay for inept government waste? To satisfy the hidden socialist agenda of the "Greens"? To line the pockets of Baby boomers who forget (couldn't be bothered) saving for their retirement!?

If the government wants to control the imminent explosion in inflation caused by rising commodity prices and a wages explosion then;

- (1) offering theft reduction - income tax reduction would greatly restrain a wages push! Offer a 20% flat tax to anyone who's base salary is fixed at 2009 levels.
- (2) Remove Murray basin water restrictions on farmers and plan to add more water to the system by pumping eastern rivers back to the west!
- (3) Cutting government costs, not increasing theft, will also reduce inflationary pressures!

This country needs theft REDUCTION not increases!

Grant Dinse
