Subject: Clarifying points in relation to Submission 9 by Dr Roderick Hill

Attention: Ash Clements

Dear Ash,

Further to our telephone conversation earlier today, I write to formally document the two points that we discussed in relation to my submission - number 9 in the list provided on the Committee's website .

1. The submission was made by me as an individual and should not be taken as a formal submission in my role as the Chair of the SA&NT Division of ATSE. To avoid any ambiguity, I should have relegated my current role as Division Chair to the list of other roles stated below my name in the heading of the document.
2. I note that the reference (in the first paragraph of the submission's Prologue) to a summary of the outcomes of a Symposium that I co-organised in June of this year on "Nuclear Energy and Net Zero", while available to Fellows of ATSE, is not available to members of the public. While it appears on the ATSE website with ATSE's approval, it has not been subject to the usual comprehensive editing by ATSE and so cannot be taken as reflecting ATSE's position on the matter.

I apologise to the Select Committee for not addressing these two matters before sending in my submission.

With kind regards,

Yours sincerely,
Dr Roderick Hill
