SUBJECT: UKRAINE ELECTRICITY REBUILD AID SUPPORT PROPOSAL

Dear Minister Wong

We are writing to you to seek Australian Government support for the Ukraine. NOJA Power has been exporting to the Ukraine for almost a decade well before the Russian invasion. We supply the electricity utilities in the Ukraine with high voltage auto reclosing circuit breakers to increase the reliability of the electricity supply. As you will be aware much of the high voltage electricity network in the Ukraine has been destroyed and is currently slowly being rebuilt. Our local distributor in the Ukraine, Recloser LLC has approached three (3) electricity utilities, DTEK Kyiv Regional Grids DSO, Chernihivoblenergo DSO and Sumyoblenergo DSO with a view to partnering with them to help them restore Electricity Network infrastructure as well as improve the safety of their electrical line workers.

The proposal is to seek AUD\$8 million in Australian Government support for NOJA Power to supply 100 of our high voltage circuit breakers for deployment in the networks of the 3 utilities listed above.

The high voltage circuit breakers will be used to rebuild networks and restore electricity supply to millions of people and to also enable remote control for the network through areas heavily affected by land mines where there is an increased danger for electricity utility workers to enter. By gaining remote control over these high voltage feeders as they are restored will also increase the safety of the electricity utility workers currently working to restore electricity supply in the Ukraine.

As NOJA Power is a proud Australian manufacturer that exports our high voltage circuit breakers to 105 countries around the world we are appealing to the Australian Government to allocate this AUD\$ 8 million support to the Ukraine in order to deploy our products that will have a significant impact on the lives of millions of people.

We are happy to provide further clarification as required. We look forward to your advice.

Yours sincerely

NEIL O'SULLIVAN
GROUP MANAGING DIRECTOR
