To Senate Committee Inquiry

Re: Just Compensation

When is enough, enough? We are irrigation farmers producing Rice, wheat and barley to feed the world.

Some years ago the NSW Government, stole 15% of our general Security water for the benefit of all Australians, via the environment with no compensation. Is this just?

We have not had a fair go for quite a long time now; the result has been family separations, suicide, bankruptcy and more. **We have had enough Sir.**

Please, if governments have to take initially purchased resources for the good of our nation, then please compensate us fairly so we too can have a decent life. This is just!

Yours sincerely

Giacinto & Teresa Quarisa
