

To Whom it may Concern,

I Tammy Perrett ,

. In the year

2007 I went private and had Pip implants placed in my breasts. 15months later I noticed a lump. 3 months later I went to the Doctor and found out I had breast cancer. My operation to remove my breast and reconstruct was to take approx 4hr but when they removed the breast the Pip implant was ruptured so badly it took 7 to 8 hr to clean it up. I had alot of pain in my arm and chest. I have one Pip implant left in and there isn't a day that goes by that I don't wonder if my cancer will come back in the Pip implant side. I have no money and still have a bill from the first set. My life feels like a time bomb. thank you for listening, have a good day. Tammy.
