M/s Julie Dennett
Secretary
Senate Legal and Constitutional Committee

Dear Madam

I am most disturbed to read a proposal to dump nuclear waste on Muckaty Station.

After the disregard for Aboriginal health and well being during the British tests at Woomera I had assumed that there would not be a repeat of this disgraceful cavalier approach.

Even if this waste is claimed to be low level toxicity it seems to me the foot is in the door, and no government can be trusted not to back down from promises.

The risks encountered during transportation are enormous and I have concerns for everyone, not just the Aboriginal population. However I am concerned that Aboriginal people may not understand the danger inherent in the proposal.

Yours sincerely,

Peg Whittington
