

TO WHOM IT MAY CONCERN:

Further to my email of the 5th March, I write to express my views on the latest developments as I've heard on my local ABC Radio in the past few days.

The enquiry MUST go to Tennant Creek, so as to allow the people who will be most affected by the proposed Nuclear Dump to express their views.

How can the Federal Government do otherwise, without giving fuel to the view that the decision is a "fait accompli", made for political expediency despite earlier scientific reports which did not see any site within the Territory as suitable?

As for me, I will remain disappointed by the cynical moves of the Rudd Government until I'm proven wrong.
