
I wish to make the following statement as to my views on our governments allowing public money to be used to fund gender selective abortion:

1. Aborting a child because of parents request for no other reason than it's not the sex we wanted in not a medical procedure, it is murder.

2. Gender selective abortion of girls gives society the OK to devalue the female sex, as a disposable object here on earth only for reproduction and sexual pleasure reasons.

3. Gender selective abortion of boys gives society the OK to feel greater, more intelligent, than the creative power of the selective process that takes place at the time of conception.

Thank you,
