SUPPORT US WITH NDIS

TO MAKE IT REAL...for our Members

we urge ALL people with a 'severe disability' (No matter what age) to support us in making application to hold firm in receiving our PM Gillard proposal for the NDIS to improve the lives of people who suffer with 'Severe Disabilities'. Join with US to have this NDIS implemented as quickly as possible in being able to 'build on' 'ALLIED MEDICAL SERVICES' for when a person is discharged from Hospital to their own home and receive ALL services, equipment that is referred by the 'Medical Treating Team' and their Local Doctor -- BULK BILLING 'electronically'.

We invite EVERYONE to support us in 'Services - in - the -Home' after discharged from Hospital to shorten the 'waiting lists for 'Ward Beds' and Electro-services. Once this is completed and the Patient is safe and discharged home, then DSP Australia Inc will help our Member and work with their Doctors & 'Allied Health Services' etc, in their own home, with 'Doctor's Home Visits'. To also create and bring back MORE Community Services' and professionals to work together to help our Members in 'serious health issues' ----- employ more 'Allied Medical Health Services' 'regular home visits from 'Nurses' (well trained) to be able to report to our Member's doctor anything that appears to be out of order and get 'Medical Help' to our Members 'URGENTLY'.

To have 'immediate access to 'Medical Equipment and 'Medical items. ie:- Wounds dressings etc. MORE help from Local Councils to take our 'House-Bound Members' out of day trips and allocate more than (1 hour per fortnight) to help clean our Members home up as well as washing and ironing 'EVERY WEEK' for at least 2 hours, this also would allow for 'some meals' to be prepared for the whole week. Create 'Self-Empowering' ' independent decision making' in comfort, fully knowing that their Organisation is totally supporting them to remain 'accountability' and confidence to 'get up and about' within the Community in safety and not be withdrawn or isolated from the Community.. Have 'immediate' methods of communications with their 'Medical Treating Team for that 'Hands on Care' Appropriate 'Aides' fitted in to their homes for easy mobility.. Every Member being allowed to decide what makes THEM feel comfortable and safe.. We invite those who are interested in helping supporting and sponsoring to us to benefit our Members and friends. Member has a different need and this is to be investigated for thorough 'Treatment and Care. IF ALL

Living in their own homes with all that is required referred by their doctors is far more economical than 'Long stays in Hospital Ward beds.
