

## Sample – Campaign 8

Dear Senate,

I am writing to express my concerns against the above Online Safety Amendment (Social Media Minimum Age) Bill.

My concerns are outlined as follows :

1. This Bill risks exposing Australians' personal data, such as IDs or biometric information, to breaches and misuse.
2. Unelected bureaucrats like the eSafety Commissioner will gain sweeping powers with no oversight.
3. The Bill links real-world identities to social media accounts, and threatens free expression.
4. Australians will be subjected to rigorous age identification processes exposing personal data and identification to Social media third parties.

It is for these reasons that I Object to this bill. I ask that you reject the Online Safety Amendment (Social Media Minimum Age) Bill and do not pass this into law.

Kind Regards,

### Sample

To whom it may concern

As an Australian citizen I wish to lodge my strenuous objection to the proposed Online Safety Amendment (Social Media Minimum Age) Bill 2024 for the following reasons:

- Bill risks exposing Australians' personal data, such as IDs or biometric information, to breaches and misuse.
- Unelected bureaucrats like the eSafety Commissioner will gain sweeping powers with no parliamentary oversight.
- The Bill undermines online anonymity, linking real-world identities to social media accounts, and threatening free expression.
- The process is being rushed with almost no time for Australians to have their say.
- There are already very effective programs that parents can purchase to monitor their children's social media exposure.
- This is just another opportunity for Government control and monitoring of Australian citizens
