Cubing

Australia Post will assess charges according to their actual weight or cubic weight equivalent, whichever is greater. The cubic weight is the parcel's volume in cubic metres multiplied by 250. Australia Post reserves the right to apply cubic charges to all parcels, and this will be more likely in instances where a parcel is large in size or irregular or cylindrical in shape. Cubing is not applicable on eligible Australia Post packaging products. For more information visit auspost.com.au/parcels-mail/size-and-weight-guidelines.

Maximum weight and size of a parcel accepted over the counter

For more detailed information refer to the *Domestic Parcels Guide* (SAP8833732).

Maximum weight	22kg
Maximum length	The greatest linear dimension must not exceed 105cm
Maximum dimension	The maximum cubic dimension must not exceed 0.25m ³

In some instances a Post Office may not have capacity to weigh parcels up to 22kg.

In these instances, the Post Office will accept the parcel if a charge can be agreed to. If not, the Post Office may refuse to accept the article.
