To Whom It May Concern:

I would like to express support for Senator Madigan's bill on suspending the Medicare support funding for sex selection abortion. I am deeply bothered knowing that my tax money is being used to support abortion of any kind. I respect their so called "right" to terminate the pregnancy. If they want to commit this evil practice then they should pay for it themselves. This is not a national concern. It is their choice. And I have the right to make sure that my tax money is being used properly and in the moral way. I don't want to be an accessory to things that murders innocent babies. Taking the support out will enable the nation to use it for other more important issues of the nation such as education, housing and employment and frees my mind from the guilt knowing that my tax money is being used to murder fetuses/infants robbing them of their right to live.

Sincerely,

Joseph Rillera
