Dear Sir/Madam,

It is not open to question that education beats legislation at every turn. We do not need jails, we need places for education so that those who are in need can get the education they need to progress with society.

**Any** and **every** person lacking basic education and work skills, who is brought before **any** court must be given every opportunity to volunteer for educational courses designed to make them work-ready so they can contribute to, and earn from, the community. Those who choose not to accept educational courses make their own choice.
