Subject: NT proposed nuclear waste dump
Date: Friday, 5 March 2010 12:02:50 PM

Dear Senators,

As federal Minister for Health 1972-75 I had radiation experts from my department cooperating with Attorney-General Murphy whose international law team successfully outlawed nuclear policies of France. The French government soon changed its policy of atomic bomb testing in the atmosphere.

I hope your enquiry will tpublish and ake full cognisance of expert opinion on the hazards of transporting and depositing nuclear waste and informed discussion and consent of all Aboriginal and other legitimately concerned persons.

Sincerely,

Douglas N. Everingham MB, BS
