Subject: Renewable Energy (Electricity) Amendment (Excessive Noise from Wind Farms) Bill 2012 No, 2012
Date: Friday, 2 November 2012 2:24:40 PM

I Fully Endorse This Bill in it's Entirety.
My seriuos concerns of being impacted by excessive noise by the Proposed Cherry Tree Wind Farm as i live approximately 4k from the nearest (Proposed) Wind Tubine. As I already have suffered from Mental Illness for 20+ years. The impact of of this will undoubtably force myself to leave this Tranquil Valley. After Travelling by road to Alice Springs in June this year I had the disappointing opportunity seeing - hearing Wind Turbines operating at two different Wind Farms in South Australia pulling over at both for a good two hours each. The Excessive Noise was unbearable close by Wind Turbines were not working however some of the distant Wind Turbines Were. Experiencing this first hand absolutely opened my eyes.
Once again supporting this is Bill is essential for me.
William Victor Kelly
