

Your Honours and ministers.

My name is Garry Edwards and I am a koala advocate and campaigner from the uk.

I urge you to please look at the link I have sent you below and seriously consider the ramifications if you allow this to happen.

Koalas are already under enough pressure with dwindling habitat and most of their conservation corridors and home ranges being destroyed at an alarming rate!!

This is an even further blow to them and to make it worse, the corridors that will be left are said to have transport links planned to run through those also!! This is absolutely unacceptable! How are the koalas native to this area going to survive this?? They're not!!

If this isn't stopped then the developers and the government who allowed this to go ahead will be responsible for wiping out the koalas in this area forever.

This endangered bushland is unique to western Sydney and is under direct threat from urban growth. The Cumberland Plain Woodland is one of six main indigenous woodland communities of Sydney. Currently, less than 6% of the Woodlands remain in small parts distributed across the western suburbs of Sydney, totalling only around 6400 hectares. Cumberland Plain Woodland was listed as an Endangered Ecological Community under the Threatened Species Conservation Act 1995 in June 1997.

PLEASE PLEASE take a look at this proposal and seriously reconsider the plans. This is a death sentence to all the koalas and wildlife that live here.

Extinction is forever 😞

Yours sincerely

Mr Garry Edwards
