

Migration Amendment (Visa Capping) Bill 2010

- 1) I personally think that this proposal is unfair and intolerable
- 2) As a temporary resident, I lodged my visa 885 in year 2008 and I submitted all the documents which fully compliance with DIAC requirements. Economic problems, labor market issues and immigration issues are not our fault.
- 3) During these PR waiting period, we have planned for our settlement in Australia. such as some people might have got a full time job, some might have bought a car, some might have invested in the business with a lot of money and we have many friends here - This place is like our second home. If any of our applications been rejected as never having been made, this loss is unacceptable
