

Email to - Committee Secretary
Senate Economics References Committee

Dear Sir/Madam

Please find set out below the responses to the questions taken on notice by Chevron Australia at the Committee's hearing on 27 August 2021.

1. Question relating to use of CO₂ for enhanced oil recovery on Barrow Island

Chevron has previously considered the use of CO₂ for enhanced oil recovery on Barrow Island. However it was determined that the Barrow Island wells were not suited to CO₂ flooding. These wells are not at sufficient pressure or depth to ensure CO₂/oil miscibility.

2. Public release of production data

In relation to any proposals to publicly release offshore production data, consideration needs to be given to SEC guidelines which require offshore production data to be treated as confidential until quarterly production figures have been released publicly. Chevron generally releases its quarterly financial and production data around 30 days after the end of each quarter. For an example of Chevron Corporation's quarterly reporting documents, see www.chevron.com/investors.

Chevron has no concerns about safety issues related to release of production data.

3. Initial forecasts of Gorgon costs and PRRT

A Final Investment Decision to proceed with Gorgon was made in 2009. At that time, the forecast project cost was forecast to be US\$37 billion. For further information, refer to [Chevron Makes Final Investment Decision to Construct Gorgon Natural Gas Project | Chevron Corporation \(gcs-web.com\)](http://Chevron Makes Final Investment Decision to Construct Gorgon Natural Gas Project | Chevron Corporation (gcs-web.com)).

At the time of Final Investment Decision, Chevron estimated that, based on its share of the Gorgon project, it would pay A\$29 billion in PRRT over Gorgon's life. Since the time of that estimate, the project cost has increased to US\$54 billion, oil price and exchange rate forecasts have varied, and Chevron has incurred additional PRRT-deductible exploration expenditure.

4. Economic contribution of the North West Shelf project

For further information on the economic and social contribution of the North West Shelf project, refer to the NWS Community Development Report available at [north-west-shelf-community-development-report-2020.pdf \(files.woodside\)](http://north-west-shelf-community-development-report-2020.pdf (files.woodside)).

5. Chevron taxes paid

A full table is attached, updated to 2020. Further information on Chevron's economic contribution is available at [tax-transparency-fact-sheet.pdf \(chevron.com\)](http://tax-transparency-fact-sheet.pdf (chevron.com)).
