

Our client is a client with a high intellectual disability, is 21 years of age and has never held a paid position before, lives remotely out of town and has no drivers licence to get to and from his employment. Taree area has very limited public transport and without BreakThru assisting the client with transport to get to and from his employment Adam would not be able to have paid employment. came to BreakThru as a very shy and reserved person who found it very hard to trust people and ask for help. has now been employed for 8 weeks and is a huge part of the company he works for. Breakthru has provided on site support, in doing so the client has built up his confidence and now feels he is an integral part of the community.
