

27/2/2010

Senate Finance + Public Administration Committee,
P.O. Box 6100 Parliament House Canberra 2600.

To Whom it may concern,

As a freehold landowner of three hundred + thirty hectares on coastal, central Qld, we would like to register our concerns over the impact of the unfair tree clearing vegetation management act placed on us without due consultation. The financial impost of this legislation, plus the cost of complying with PMAVS etc and the loss of productive land for grazing has forced us to agist other property to remain viable. We are both from farming families and over the 25 years have seen and felt the impact of more and more regulations be imposed on us farmers, please just let us farmers farm and proudly feed Australia + the world.

Sincerely concerned
