Dear Committee Members,

I am \_\_\_\_\_ years old and I smoked for \_\_\_\_\_ years.

I tried quitting smoking in the past using the methods listed below however, these methods did not work for me.

I switched to vaping \_\_\_\_\_ months, or \_\_\_\_\_ years ago.

Other (specify): \_\_\_\_\_

Thanks to vaping, I don't smoke anymore and since I'm not inhaling smoke anymore my health has improved dramatically. On a scale of 1 to 5 (1 is a little and 5 is a lot), my health has improved by \_\_\_\_\_.

Under Australian law it is legal to buy tobacco cigarettes. However, within Australia it is illegal to buy nicotine e-liquid for vaping which has effected Australian citizens ability to access this alternative. People who vape within Australia are forced to purchase nicotine e-liquid from overseas countries while traveling or to import small quantities for personal use from e-liquid vendors in countries such as New Zealand. It's absurd that smoking, the most harmful way of consuming nicotine is legal but the less harmful alternative of vaping is not. I firmly believe these laws need to change and plead with the Committee to recommend that they do. Vaping is legal in other first world countries, including other commonwealth countries such as New Zealand, the U.K. & Canada, so why should Australia be any different?

I vote, and I support the full legalisation of nicotine for use in electronic cigarettes in Australia.

Yours sincerely,
