Re: Urgent Appeal to take care/compensate jeopardised Australian small businesses including home sustainability assessors

Dear Sir/Madam,

With great honor, I would like to state that I , Salikin Zilani of
in New South Wales, am an assessor
and a victim of this discontinuation of a possible successful program and initiative undertaken by Federal Government. I am happy to share that I am by myself a very much “Green Considerate” person and love everything goes Green for the betterment of us and our next generation. Following that, I have put the name of my business as “Australian Environment & Home Protector”.

In this message, I would like to address few issues that hampered me NOT ONLY financially BUT ALSO mentally distressed and pessimistic working for the “Lets Go Green” programs.

- Initially, as part of Government’s energy efficiency program, I was in Home Insulation industry working for a Lane Cove based Insulation company.
- After working few months in insulation industry, I have taken the initiative in government’s wider environment efficiency program by undertaking ABSA accredited HSA training program and becoming a successful assessor.
- I have put my own small business and bought a car and started getting appointments for the business to run and so far the expense after this is about \$5000 and in return I have not earned a single dollar yet.
- I have lost my another job and still I am unemployed while I was chasing to make this program successful.
- It made me financially broke and mentally upset and distressed.

At the same time, I have made a nice draft for the better feasibility of this Going Green program and making government’s initiative successful.

At this stage, I would like to see and am yearning all of my personal expenses get considered with great care with compensation in the first place. And surely, I would like to put the drafted project of mine to see it as a successful program while making the program implemented in successful manner.

I leave my urgent appeal of compensation under your discreet intelligence and I believe the way I put the efforts to make the government alias lets go green program

successful,you would do the same to address my serious issues carefully and considerably.

Yours Sincerely,

Salikin Zilani
