

we would like to let you know the impact that the supermarket price decisions have had on our business since it began in January until the end of June we estimate we have lost between \$8000 and \$10000 because of the market share our milk company Parmalat have lost, our access to market milk has dropped by about 10%. The result is we have had to put off one of our casual milkers which has meant a bigger work load for the rest of us We hope some common sense prevails so that we can continue to operate as a viable business
