As an Australian Citizen,

I object to the proposed bill to build a nuclear waste dump in Muckaty Station outside Tenant Creek in the NT.

I strongly object because it overrides all relevant state and territory legislation as well as overriding commonwealth environmental and Aboriginal heritage protections.

It also overrides private property rights of affected individuals with regards the dump site or its access route.

Furthermore, the proposed site is an earthquake-prone area which could lead to other potential environmental problems.

Furthermore, the transport of nuclear waste to such areas becomes an easy target and opportunity for terrorist attack.

How could the waste be transported thousands of km safely?

Kind Regards,

Matthew Dowd
