

VOLUNTARY TO SALARY

Submission No. **118 A**

According to a 1997 survey by the Department of Communication and Arts, the community radio sector trains about 5000 people a year in radio and media related skills. Anecdotal evidence suggests that about a third of community radio volunteers go on to paid employment in radio and media related industries.

It is impossible to follow the careers of every volunteer who has developed their skills in the community broadcasting sector, however the following list provides an impressive snapshot of the continuing success of individuals who have had an association with 2SER-FM. The list was updated in March 2006.
