Subject: action on climate change now!

The messages the politicians at this Inquiry should hear are:

- a.. Australia should ratify the Kyoto Protocol
- b.. There are many economic opportunities in changing Australia's economy into a greenhouse friendly one
- c.. Human induced warming of the earth is recognised by the world's scientific community as a reality
- d.. The scientific community is also concerned about the irreversible impacts of climate change
- e.. There are economic, environmental and human costs if we do not immediately reduce the amount of CO2 going into the atmosphere
- f.. Climate skeptic's arguments have no scientific weight and should not be encouraged by decision-makers.
