

This was a hand written submission by Mr Rohan Langford and has been transcribed by the secretariat.

To whom it may concern,

I am increasingly becoming disillusioned with the way successive Australian governments companies in general to rape our beautiful nation and its people.

The WTO has been given right of way to destroy the Australian farming industry, logging industry, and thousands of small businesses. This is not to mention the damage they have caused to less developed countries.

The carnage caused by slave labour in these countries is disgusting and it is the responsibility of every Australian to do what they can to put an end to these atrocities. By helping and encouraging the use of small businesses and local industry we would not only see an improvement in conditions in less developed countries but also a large decrease in the rate of youth suicide and drug abuse in our country, as young people would have a purpose they could believe in.

I request that the Australian government stop taking orders from the WTO, create a tax system that is fairer to the people by taxing TNC's more heavily, reintroduce tariffs on imports to help local business and industry, refuse genetically modified foods and seeds imported from overseas, start to involve community input on matters relating to the WTO, and stop your underhanded deception of the Australian public.

Yours truthfully

Rohan Langford.
