

In my submissions on page 11 at the 4th last paragraph from the bottom of the page -I stated that \" The legislation-'Constitution Alteration Bill' does alter the constitution alright and Howard is trying to privatise by stealth by repealing s69 of the constitution. s69 vests the posts telagraphs and navigational beacons and even the customs in the Commonwealth and if it is repealed it is only a short trip to privatisation heaven\"

It appears that I have through MY own stupidity made a fool of myself in front of the Australian people by claiming this, I think I will get my eyes checked and then try to pick the difference between 59 and 69.

I ask that the relevant paragraph deleted and -although I cant stand this government I shall hereby apologise for wrongly claiming it to be so..but I know the mungrels were thinking about it.

To the committee, I would consent to this request being placed on the net as an apendix to my submission so that the Australian people can see that unlike the government about Jabiluka, or Turnbull about the fact that his model stinks..I am willing to admit what I said in this particular paragraph was wrong.
