

Subject: Legislation on Telco infrastructure
Date: Thursday, 10 November 2011 7:19:10 AM

Sir,

We understand that The Federal Government is in the process of reviewing the legislation governing the siting of Telco infrastructure. We strongly support this initiative which we feel is long overdue.

We are living close to the Point Walter Golf Course and have struggled for many months to prevent Telstra from building a communication tower in the middle of the golf course.

We demand that legislation on the siting of Telco infrastructure such as phone towers shall be in place that protects tax payers, the community, the environment and individuals.

With kind regards
Manfred & Johanna Henze
