

I do not consent in any way shape or form to any amendments to our constitution whatsoever. Any attempts at constitutional recognition of local government / councils, through trickery, or deliberately confusing and ambiguous questions, will be met with maximum public exposure through the likes of "Get up", mass media press release, face book and other non controlled sources.

The fact that this is on the agenda once again ('77 - failed, '88 - failed) is not only a gross waste of resources, but speaks volumes about those in our government that seek to benefit from such treachery.

G Moon
